the Cambro® story

When William and Argyle Campbell first opened the doors at Cambro Manufacturing in 1951, their goal was to make the highest quality hospital meal tray possible. Named the Camtray, it demonstrated that they were as committed to excellence in the foodservice industry as they were with their own products. As 2025, marked the company's 74th year of leadership in quality, innovation and customer service, today Cambro serves the world with the industry's most complete selection of products for widely diverse segments of the foodservice business. The future is certain to bring great changes to our industry. Yet one thing that will remain a constant is Cambro's tradition of continually developing new products that help foodservice operators save time and money, increase sales, reduce labor and improve service. In the years ahead, guided by the commitment of its founders to innovation, quality, and value, Cambro Manufacturing will still be the leader in serving the foodservice industry and you, our valued customer.

FULL 270° ACCESS

Durable hinges and latches allow the door to open 270° and remain open securely to the side of the front loader for easy access to products. Latches keep door securely closed during transport.

4-SIDED HANDLING

Thoughtfully designed, built-in handles along the top of the front loader units allow them to be easily carried from all four sides.

UNIQUE DESIGN

Compartment for cold chiller plate or hot plate is located on the inner back wall to prevent overhead condensation drips and to evenly distribute temperature throughout the carrier.

GENTLE OPEN AND CLOSE

Beveled door edges ensure door can be easily closed and latched. Durable latches for long term use.

DRIP-RESISTANT

Built-in condensation barrier helps front loaders to remain drip-resistant.

HIGH DENSITY STORAGE FLOOR TRACK SYSTEM

Maximize storage capacity by creating storage aisles in all available space. This simple system is composed of stationary starter units anchored to a raised floor track system at both ends with high density mobile units installed in between. Easy to install track requires no drilling or gluing.

Increases Storage Capacity Up To

50%

High Density Mobile Units are available with factory assembled post kits, vented or solid shelves and high density casters and bumpers. Full track and extension kits ship complete with required hardware. Stationary Starter Units are required to anchor the system at both ends. Choose from a wide selection of sizes with 4 or 5 shelves to maximize storage space. (See Premium Series spec pages).

Only available from Cambro European Logistics (CEL), Germany and Cambro Özyay Turkey.

Raised Floor Track provides a smooth and level surface to easily roll mobile units. Raised track ensures dirt will not get trapped and is easy to clean. Aluminum track and stainless steel hardware are rust resistant.

*It is recommended to use a stationary unit for every 4,5 m of track to further stabilize the system.

Grooved casters roll easily and securely on raised track.

Raised track connects easily to the bottom of a stationary unit that works as a system anchor. No bolts, no glue or drilling into the floor are required. Easy and fast set up.

Observe scratches and abrasions as a result of friction between porcelain dinnerware and the tray surface.
